Introduction

PROBLEM STATEMENT

In Pakistan, many elite-class homes remain vacant when owners go abroad, and middle-class families often have spare rooms or floors. Hotels face challenges building booking platforms, and renters still rely on outdated property dealer networks.

While Airbnb exists, it's not widely used in Pakistan due to:

- **No support for PKR**
- **Limited payment options** (PayPal-not supported in Pakistan, low credit card usage)
- **Lack of local and cultural adaptation**

At the same time, **travelers struggle to find affordable short-term stays** and are often forced to book expensive hotel rooms.

Homyfy solves this by offering a locally built platform where homeowners and hotels can list spaces, and travelers can book **budget-friendly rooms**, making the process simple, secure, and tailored for the Pakistani market.

Background

Pakistan's real estate and travel accommodation industries are still largely driven by offline practices and manual broker-based systems. While global platforms like Airbnb have revolutionized short-term rentals globally, their adoption in Pakistan remains low due to currency, payment, and localization barriers. Simultaneously, domestic travelers and tourists often lack access to affordable, trustworthy, and well-listed accommodations, especially outside major cities.

The gap between **available but unused spaces** (like spare floors, guest rooms, or vacation homes) and **those in need of temporary stays** remains largely unaddressed by digital platforms tailored to the local market.

Motivation

- To **empower homeowners** to earn passive income from underused spaces.
- To provide **affordable accommodation options** for travelers, tourists, and temporary workers.
- To **digitize and simplify** the property rental process in Pakistan.
- To offer a **Pakistan-specific alternative** to Airbnb that supports local payment methods and currency.

- To make the accommodation market **more accessible**, especially for people without access to traditional online payment tools or platforms.

User Guide

1. Accessing the Platform

Homyfy is a web-based application accessible through any modern web browser on desktop, tablet, or mobile devices.

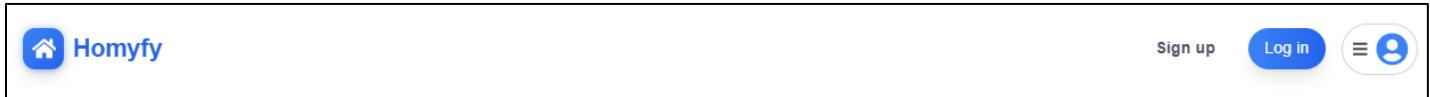

For a complete live demo and interaction, visit the website with the following link:

<https://homyfy-rho.vercel.app/>

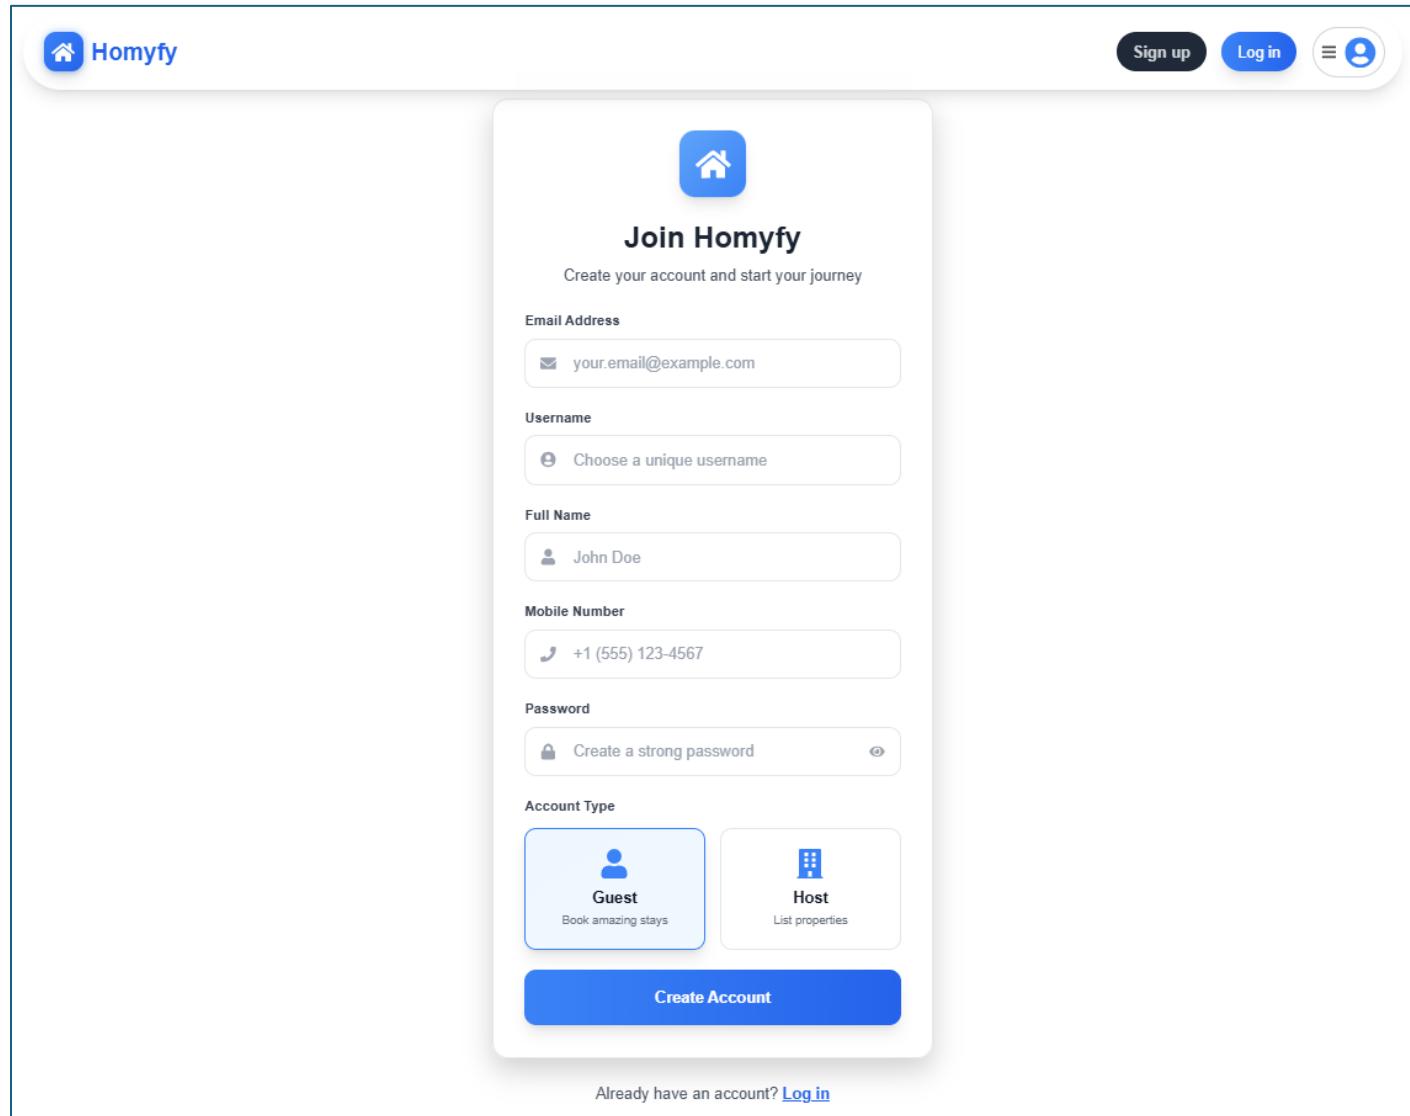

2. Account Creation

To access all features, you must create an account.

1. Click on the **Login** or **Signup** button in the top navigation bar.

2. Signup: Enter your email, password, and full name.

The screenshot shows the Homyfy sign-up page. At the top left is the Homyfy logo. At the top right are three buttons: "Sign up" (black), "Log in" (blue), and a user profile icon. The main form has a title "Join Homyfy" with a subtitle "Create your account and start your journey". It contains fields for Email Address (with placeholder "your.email@example.com"), Username (placeholder "Choose a unique username"), Full Name (placeholder "John Doe"), Mobile Number (placeholder "+1 (555) 123-4567"), and Password (placeholder "Create a strong password"). Below these is an "Account Type" section with two options: "Guest" (Book amazing stays) and "Host" (List properties). A large blue "Create Account" button is at the bottom. At the very bottom, a link says "Already have an account? [Log in](#)".

3. Login: Use your registered email and password.

Note: Authentication is secured using **Supabase**.

3. Main Features Guide

a) For Guests (Travelers)

i. Search & Explore

- **Homepage:** Browse featured listings and popular destinations.

The screenshot shows the Homify homepage. At the top, there's a banner with the text "Find your next adventure" and "Discover the perfect place to stay, anywhere in Pakistan". Below the banner, there are three stats: "1,000+ Properties", "4.5 Average Rating", and "3+ Cities". A search bar has "Where are you going?" and "1 guest" selected. Below the search bar, there are category tabs: All, Apartments, Houses, Villas, and Others. To the right of the tabs are "Filters" and "Sort" buttons. The main content area displays four featured property listings with images, names, ratings, locations, and prices. Each listing includes icons for bed, bath, and guest counts, as well as a "Featured" badge. At the bottom right, there are two blue circular buttons with "+" and "^" symbols.
